Subject: RE: Superfund Designation in Grenada

No problem. The EPA does not specify in the listing the actual geographical area. The Site includes all areas where Site related contamination has come to be located. The final Site boundaries will be developed during the Remedial Investigation, which includes the Eastern Heights neighborhood, and can expand at any time with new data. The investigation map was updated per the request of Trey Baker and can be found at the link here date 2/16/2018.

Subject: Superfund Designation in Grenada

Shelby and Stephen,
I saw the press release today naming Grenada to the NPL. I have searched for something that shows the geographic areas included in the listing, but can't locate anything yet. Can either of you point me to that resource? As you can imagine, I have had inquiries, and I am trying to be a source of information on that issue for our clients.

Thanks, and hope you are both doing well.

Lawrence
